

Dr. Linda Bennett

Dr. Melanie Macbeth

Dr. Rebecca Maida

We pride ourselves on providing our patients with the best possible standard of care. **Because of this we now perform the Optomap Retinal Exam on all of our patients.** This non-invasive procedure allows us to see a much broader and more detailed view of the retina than is possible with conventional methods. This can greatly help in detecting eye diseases, as well as numerous systemic conditions that may show signs in the eye. When reviewed, the scan becomes a permanent part of your medical file. This enables us to make important comparisons should potential problems show themselves at a future examination.

**Drs. Bennett, Macbeth, and Maida strongly believe that the Optomap Retinal Exam is an essential part of your comprehensive eye exam and recommend it for all patients once per year.**

**PLEASE NOTE:**

Most health plans treat the Optomap Retinal Exam as a non-covered service, meaning that you would be responsible for the charges.

In some cases the Optomap is used to track a preexisting retinal condition or to document a new condition. If this is the case, your doctor will make you aware of this during your exam.

Please feel free to ask us any questions or concerns that you may have.
